Creativity in Intelligent Technologies and Data Science Nov 19 2022 This book constitutes the refereed proceedings of the Second Conference on Creativity in Intelligent Technologies and Data Science, CIT&DS 2017, held in Volgograd, Russia, in September 2017. The 58 revised full papers and two keynote papers presented were carefully reviewed and selected from 194 submissions. The papers are organized in topical sections on Knowledge Discovery in Patent and Open Sources for Creative Tasks; Open Science Semantic Technologies; Computer Vision and Knowledge-Based Control; Pro-Active Modeling in Intelligent Decision Making Support; Data Science in Energy Management and Urban Computing; Design Creativity in CASE/CAI/CAD/PDM; Intelligent Internet of Services and Internet of Things; Data Science in Social Networks Analysis; Creativity and Game-Based Learning; Intelligent Assistive Technologies: Software Design and Application.

Automotive Technician Training: Theory Apr 19 2020

A blended learning approach to automotive engineering at levels one to three. Produced alongside the ATT online learning resources, this textbook covers all the theory and technology sections that students need to learn in order to pass levels 1, 2 and 3 automotive courses. It is recommended by the Institute of the Motor Industry and is also ideal for exams run by other awarding bodies. Unlike the current textbooks on the market though, this title takes a blended learning approach, using interactive features that make learning more enjoyable as well as more effective. When linked with the ATT online resources it provides a comprehensive package that includes activities, video footage, assessments and further reading. Information and activities are set out in sequence so as to meet teacher and learner needs as well as qualification requirements. Tom Denton is the leading UK automotive author with a teaching career spanning lecturer to head of automotive engineering in a large college. His nine automotive textbooks published since 1995 are bestsellers and led to his authoring of the Automotive Technician Training multimedia system that is in common use in the UK, USA and several other countries.

Handbook of Environmental Degradation of Materials Oct 14 2019

Nothing stays the same for ever. The environmental degradation and corrosion of materials is inevitable and affects most aspects of life. In industrial settings, this inescapable fact has very significant financial, safety and environmental implications. The Handbook of Environmental Degradation of Materials explains how to measure, analyse, and control environmental degradation for a wide range of industrial materials including metals, polymers, ceramics, concrete, wood and textiles exposed to environmental factors such as weather, seawater, and fire. Divided into

sections which deal with analysis, types of degradation, protection and surface engineering respectively, the reader is introduced to the wide variety of environmental effects and what can be done to control them. The expert contributors to this book provide a wealth of insider knowledge and engineering knowhow, complementing their explanations and advice with Case Studies from areas such as pipelines, tankers, packaging and chemical processing equipment ensures that the reader understands the practical measures that can be put in place to save money, lives and the environment. The Handbook's broad scope introduces the reader to the effects of environmental degradation on a wide range of materials, including metals, plastics, concrete, wood and textiles. For each type of material, the book describes the kind of degradation that affects it and how best to protect it. Case Studies show how organizations from small consulting firms to corporate giants design and manufacture products that are more resistant to environmental effects.

Concrete Repair, Rehabilitation and Retrofitting Feb 16 2020

The First International Conference on Concrete Repair, Rehabilitation and Retrofitting (ICCRRR 2005) was held in Cape Town, South Africa, in November 2005. The conference was a collaborative venture by researchers from the South African Research Programme in Concrete Materials (based at the Universities of Cape Town and The Witwatersrand) and The Construction Materials Section at Leipzig University in Germany. The conference focused on appropriate repairing, maintaining, rehabilitating, and, if necessary, retrofitting existing infrastructure with a view to extending its life and maximising its economic return.

Sex differences in Cardiac Diseases Jun 14 2022

Significant biological differences exist between men and women that contribute to sex-specific differences in cardiovascular disease (CVD) risk factors, pathophysiology, presentation, response to therapy, and prognosis. It is essential for clinicians to be cognizant of these sex-specific differences in order to reduce the disparity in diagnosis and management of cardiovascular diseases in both genders. Sex Differences in Cardiac Disease provides a timely review of the contemporary data on these sex-specific

differences in pathophysiology, clinical presentation, diagnostic evaluation, and management of cardiovascular diseases that fills a void for clinicians in practice and training. With contributions from renowned experts in the field and guideline writers, the text provides a state-of-the-art review of each topic encompassing the full spectrum of CVD in men and women. Sex-specific guideline-based recommendations are highlighted when available. Tailored to meet the needs of the busy clinicians and researchers, this text provides concise practical data to care for men and women at risk for or with CVD. The book serves as an essential resource for researchers, cardiologists, obstetricians, gynecologists, internists, family practitioners, nurse practitioners and physician assistants, and respective trainees who treat men and women with CVD. Provides a comprehensive state-of-the-art text written by internationally renowned experts in the field of CVD disease, serving as an indispensable resource for clinicians and researchers Enables the reader to understand the sexual dimorphism in the pathophysiology, diagnosis, management, and outcomes of the full spectrum of cardiovascular issues including ischemic heart disease, valvular disorders, arrhythmias, and heart failure Provides a concise evidence-based practical review of medical topics, with key points and eye-catching visual infographics to meet the needs of the busy clinicians, policy makers and researchers.

Optimized Equipment Lubrication Dec 08 2021

The book describes the methods and procedures to optimally applying lubricant to all kinds of general purpose machines. These include process pumps, electric motors and other equipment incorporating rolling element bearing where traditional methods are usually very much out of step with best available practices. Failure analysis, reliability strategies, remedial steps or desirable substitute approaches are also explained.

Chinese Maritime Cases Jan 21 2023 This book selects leading, innovative and influential Chinese maritime judgments and presents full translation of them, with brief summary, to the readers so that they can have insights of how the Chinese maritime judges interpret, apply and develop Chinese maritime law in practice. China trades with other states in trillions of USD every year, and about 95% of the cargoes are carried by ocean-going ships calling at hundreds of Chinese ports each single day. Due to the enormous and steadily growing trade volume and shipping activities, foreign ships, companies and persons are often caught by the Chinese maritime law and court. The parties involved and their lawyers are more than ever enthusiastic to study Chinese maritime cases in order to deal with their own cases properly or, if possible, predict the potential problems and avoid the disputes outright. The book is appealing to and benefits worldwide law students, academics, practitioners and industrial people in the shipping, trade, insurance and financial fields. The book remedies to certain extent the situation that there is lack of authoritative sources available to foreign personnel to look into how Chinese justice system functions.

Distribution Law: Antitrust Principles & Practice, 3rd Edition Dec 20 2022

The cornerstone reference on antitrust issues that arise from distribution arrangements. Establish a sound manufacturer-distributor relationship in full compliance with federal and state antitrust law; understand enforcement factors and the effect of antitrust regulation on distributor behavior; handle pricing, vertical restraints, exclusivity, tying, and refusal to deal. For insightful analysis and practical guidance on the antitrust issues that arise from distribution arrangements, turn to Theodore Banks. With this unique resource you'll be able to prepare for, or even prevent, the antitrust-based disputes that all too often mar the manufacturer-distributor relationship. *Distribution Law: Antitrust Principles and Practice, Third Edition* shows you

how to: Establish a sound manufacturer-distributor relationship in full compliance with federal and state antitrust law Understand enforcement factors and the effect of antitrust regulation on distributor behavior Handle problems arising from such areas as pricing, vertical restraints, exclusivity, tying, and refusal to deal. You will get factual analysis of virtually every significant distribution antitrust case. You will find in-depth, practical analysis of such specific issues as: lost profits, predatory pricing, market definition, antitrust damages, and judicial latitude in discovery. Note: Online subscriptions are for three-month periods.
