This book constitutes the refereed proceedings of the 17th International Conference on Modeling
Decisions for Artificial Intelligence, MDAI 2020, held in Sant Cugat, Spain, in September 2020.
24 papers presented in this volume were carefully reviewed and selected from 46 submissions
discuss different facets of decision processes in a broad sense and present research in data
data privacy, aggregation functions, human decision making, graphs and social networks, and
recommendation and search. The papers are organized in the following topical sections: aggregation
operators and decision making, and data science and data mining. * The conference was cancelled
due to the COVID-19 pandemic. In A Social History of Truth, a leading scholar addresses these
universal questions through an elegant recreation of a crucial period in the history of early modern
science: the social world of gentlemen-philosophers in seventeenth-century England. Steven Shapin
paints a vivid picture of the relations between gentlemanly culture and scientific practice. He
shows that problems of credibility in science were solved through the codes and conventions of gentlemanly
conduct: trust, civility, honor, and integrity. This two-volume set LNCS 13192 - 13193 constitutes

refereed proceedings of the 17th International Conference on Information for a Better World: Shaping the Global Future, held in February 2022. Due to COVID-19 pandemic the conference held virtually. The 32 full papers and the 29 short papers presented in this volume were carefully reviewed and selected from 167 submissions. They cover topics such as: Library and Information Science; Information Governance and Ethics; Data Science; Human-Computer Interaction and Technology ? Information Behaviour and Retrieval ? Communities and Media ? Health Information. Now in its seventeenth edition, *Social Science: An Introduction to the Study of Society* approaches study from a common-sense perspective, rather than a formalistic perspective more common in science. Readers will see how seemingly diverse disciplines intermingle and connect to one another, such as anthropology and economics, for example. The goal of the book is to teach students critical thinking and problem-solving skills that will allow them to approach social issues in an objective and informed way. New to this edition are significant updates on: The election of Donald Trump and the emergence of related populist movements Trade policy and health care Issues involving migration and immigration Emerging developments in artificial intelligence Comparisons between cultural and biological evolution Examples, data, recommended readings, and internet questions A collection of eighteen essays, which originally were delivered as lectures, read as papers, or submitted as journal articles, this book records the intellectual voyage in political science by Dr. Remigio E. Agpalo, a student, teacher, researcher, and professor. The six-volume set LNCS 10404-10409 constitutes the refereed proceedings of the 17th International Conference on Computational Science and Its Applications, ICCSA 2017, held in Trieste, Italy, in July 2017. The 313 full papers and 12 short papers included in the 6-volume proceedings set were carefully reviewed and selected from 1677 submissions. Apart from the general tracks, ICCSA 2017 included 43 international workshops in various areas of computational sciences, ranging from computational science technologies to other areas of computational sciences, such as computer graphics and virtual reality. Furthermore, the 2017 year ICCSA 2017 hosted the XIV International Workshop On Quantum Reactive Scattering. The program also featured 3 keynote speeches and 4 tutorials. The six-volume set LNCS 10404-10409 constitutes the refereed proceedings of the 17th International Conference on Computational Science and Its Applications, ICCSA 2017, held in Trieste, Italy, in July 2017. The 313 full papers and 12 short papers included in the 6-volume proceedings set were carefully reviewed and selected from 1677 submissions. Apart from the general tracks, ICCSA 2017 included 43 international workshops in various areas of computational sciences, ranging from computational science technologies to other areas of computational sciences, such as computer graphics and virtual reality. Furthermore, the 2017 year ICCSA 2017 hosted the XIV International Workshop On Quantum Reactive Scattering. The program also featured 3 keynote speeches and 4 tutorials. This volume presents the 17th International Conference on Information Technology—New Generations (ITNG), and chronicles an annual event on state of the art technologies for digital information and communications. The application of advanced information technology to such domains as astronomy, biology, education, geosciences, security, and healthcare are among the themes explored by the ITNG proceedings. Visionary ideas, theoretical and experimental results, as well as prototypes, designs, and tools that help information flow to end users are of special interest. Specific topics include Machine Learning, Robotics, High Performance Computing, and Innovative Methods of Computing. The conference features keynote speakers; a best student contribution award, poster award, and service award; a technical open house and workshops/exhibits from industry, government, and academia. For the past 25 years the conference has been the major forum for the presentation of new results in automated deduction. This volume contains the papers and system descriptions selected for the 17th International Conference on Automated Deduction, CADE-17, held June 17-20, 2000, at Carnegie Mellon University.

University, Pittsburgh, Pennsylvania (USA). Fifty-three research papers and twenty system descriptions were submitted by researchers from fifteen countries. Each submission was reviewed by at least three reviewers. Twenty-four research papers and fifteen system descriptions were accepted. The accepted papers cover a variety of topics related to theorem proving and its applications, including proof carrying code, cryptographic protocol verification, model checking, cooperating decision procedures, program verification, and resolution theorem proving. The program also included three invited lectures: "High-level verification using theorem proving and formalized mathematics" by John Harrison, "Scalable Knowledge Representation and Reasoning Systems" by Henry Kautz, and "Connecting Bits with Floating-Point Numbers: Model Checking and Theorem Proving in Practice" by Carl Seger. Abstracts or full papers of these talks are included in this volume. In addition to the accepted papers, system descriptions, and invited talks, this volume contains one page summaries, four tutorials and five workshops held in conjunction with CADE-17. This book constitutes the refereed proceedings of the 17th International Conference on Mobile Web and Intelligent Information Systems, MobiWIS 2021, held as a virtual event, in August 2021. The 15 full papers presented in this book were carefully reviewed and selected from 40 submissions. The papers in MobiWIS 2021 deal with focus on topics such as security and privacy; web and mobile applications; networking and communication; intelligent information systems; and IoT and ubiquitous computing. These proceedings showcase the best papers selected from more than 500 submissions, introducing readers to the top research topics and the latest developmental trends in the theory and application of Man-Machine-Environment System Engineering (MMESE). This research topic was first established in China by Professor Shengzhao Long in 1981, with direct support from one of the greatest Chinese scientists, Xuesen Qian. In a letter to Shengzhao Long from October 22nd, 1993, Xuesen Qian wrote: "You have created a very important modern science and technology in China!" MMESE primarily focuses on the relationship between Man, Machine and Environment, studying the optimum combination of related Man-Machine-Environment systems. In this paradigm, "Man" refers to working people as the subject at the workplace (e.g. operators, decision-makers); "Machine" is the general name for any object controlled by Man (including tools, machinery, computers, and technologies), and "Environment" describes the specific working conditions under which Man and Machine interact (e.g. temperature, noise, vibration, hazardous gases etc.). In turn, the theoretical goals of optimization are to ensure safety, efficiency and economy in this context. These proceedings present interdisciplinary studies on the concepts and methods of physiology, psychology, systems engineering, computer science, environmental science, management, education, and other related disciplines. They offer a valuable resource for all researchers and professionals whose work involves interdisciplinary areas touching on MMESE subjects. The six-volume set LNCS 10404-10409 constitutes the refereed proceedings of the 17th International Conference on Computational Intelligence and Its Applications, ICCSA 2017, held in Trieste, Italy, in July 2017. The 313 full papers and 11 short papers included in the 6-volume proceedings set were carefully reviewed and selected from 1000 submissions. Apart from the general tracks, ICCSA 2017 included 43 international workshops in various areas of computational sciences, ranging from computational science technologies to other areas of computational sciences, such as computer graphics and virtual reality. Furthermore, the year ICCSA 2017 hosted the XIV International Workshop On Quantum Reactive Scattering. The program also featured 3 keynote speeches and 4 tutorials. This edited book presents the scientific outcomes of the 17th International Conference on Software Engineering, Artificial Intelligence Research, Management and Applications (SERA 2019) held on May 29-31, 2019 in Honolulu, Hawaii. The aim of the conference was to bring together researchers and scientists, business entrepreneurs, teachers, engineers, computer users and students to discuss the numerous findings

computer science and to share their experiences and exchange new ideas and information in a meaningful way. This book includes 15 of the conferences most promising papers featuring research in software engineering, management and applications. Today, online technologies are at the core of most fields of engineering and society as a whole. This book discusses the fundamental applications and lessons learned in the field of online and remote engineering, virtual instrumentation, and other related technologies like Cross Reality, Data Science & Big Data, Internet of Things & Industrial Internet of Things, Industry 4.0, Cyber Security, and M2M & Smart Objects. Since the first Remote Engineering and Virtual Instrumentation (REV) conference in 2004, the series has focused on the use of the Internet for engineering tasks, as well as the related opportunities and challenges. In a globally connected world, interest in online collaboration, teleworking, remote services, and other digital working environments is rapidly increasing. In this context, the REV conferences discuss fundamentals, applications and experiences in the field of Online and Remote Engineering as well as Virtual Instrumentation. Furthermore, the conferences focus on guidelines and new concepts for engineering education in higher and vocational education institutions, including emerging technologies in learning, MOOCs & MOOLs, and open resources. This book presents the proceedings of REV2020 on "Cross Reality and Data Science in Engineering" which was held as the 17th in series of annual events. It was organized in cooperation with the Engineering Education Transformations Institute and the Georgia Informatics Institutes for Research and Education and was held at the College of Engineering at the University of Georgia in Athens (GA, USA, from February 26 to 28, 2020. "The Knowledge Machine is the most stunningly illuminating book of the last several decades regarding the all-important scientific enterprise." —Rebecca Newberger Goldstein, author of *Plato at the Googleplex* A paradigm-shifting work, *The Knowledge Machine* revolutionizes our understanding of the origins and structure of science. • Why is science so powerful? • Why did it take so long—two thousand years after the invention of philosophy and mathematics—for the human race to start using science to learn the secrets of the universe? This groundbreaking work that blends science, philosophy, and history, leading philosopher of science Michael Strevens answers these challenging questions, showing how science came about only because thinkers stumbled upon the astonishing idea that scientific breakthroughs could be accomplished by breaking the rules of logical argument. Like such classic works as Karl Popper's *The Logic of Scientific Discovery* and Thomas Kuhn's *The Structure of Scientific Revolutions*, *The Knowledge Machine* grapples with the meaning and origins of science, using a plethora of vivid historical examples to demonstrate that scientists willfully ignore religion, theoretical beauty, and even philosophy to embrace a constricted code of argument whose very narrowness channels unprecedented energy into empirical observation and experimentation. Strevens calls this scientific code the iron rule of explanation, and reveals the way in which the rule, precisely because it is unreasonably close-minded, overcomes individual prejudices to lead humanity inexorably toward the secrets of nature. "With a mixture of philosophical and historical argument, and written in an engaging style" (Alan Ryan), *The Knowledge Machine* provides captivating portraits of some of the greatest luminaries in science's history, including Isaac Newton, the chief architect of modern science and its foundational theories of motion and gravitation; William Whewell, perhaps the greatest philosopher-scientist of the early nineteenth century; and Murray Gell-Mann, discoverer of the quark. Today, Strevens argues, in the face of threats from a changing climate and global pandemics, the idiosyncratic but highly effective scientific knowledge machine must be protected from politicians, commercial interests, and even scientists themselves who seek to open it up, to make it narrower and more rational—and thus to undermine its devotedly empirical search for truth. Rich with illuminating and often delightfully quirky illustrations, *The Knowledge Machine*, written in a

winningly accessible style that belies the import of its revisionist and groundbreaking concepts, radically reframes much of what we thought we knew about the origins of the modern world.

Volume set LNCS 10404-10409 constitutes the refereed proceedings of the 17th International Conference on Computational Science and Its Applications, ICCSA 2017, held in Trieste, Italy, in July 2017. The 313 full papers and 12 short papers included in the 6-volume proceedings set were carefully reviewed and selected from 1052 submissions. Apart from the general tracks, ICCSA 2017 included 43 international workshops in various areas of computational sciences, ranging from computational science technologies to specific areas of computational sciences, such as computer graphics and virtual reality. Furthermore, this year ICCSA 2017 hosted the XIV International Workshop On Quantum Reactive Scattering. The program also featured 3 keynote speeches and 12 tutorials. This invaluable volume set of Advances in Geosciences continues the excellent tradition of the Asia-Oceania scientific community in providing the most up-to-date research results on a wide range of geosciences and environmental science. The information is vital to the understanding of the effects of climate change, extreme weathers on the most populated regions and fastest moving economies in the world. Besides, these volumes also highlight original papers from many prestigious research institutions which are doing cutting edge study in atmospheric physics, hydrological science and water resource, ocean science and coastal study, planetary exploration and solar system science, seismology, tsunamis, upper atmospheric physics and space science.

Sample Chapter(s) Chapter 10: Raingauge-Based Rainfall Nowcasting with Artificial Neural Network (208k)

This Is A New Release Of The Original 1667 Edition. This book constitutes the refereed proceedings of the 17th International Conference on Computational Methods in Systems Biology, CMSB 2019, held in Trieste, Italy, in September 2019. The 14 full papers, 7 tool papers and 11 posters were carefully reviewed and selected from 53 submissions. Topics of interest include formalisms for modeling biological processes; models and their biological applications; frameworks for model verification and validation, analysis, and simulation of biological systems; high-performance computational systems for biology and parallel implementations; model inference from experimental data; model integration from biological databases; multi-scale modeling and analysis methods; computational approaches in synthetic biology; and case studies in systems and synthetic biology.

17o Congreso Internac. de Ciencias Históricas. - v.2. The field of semantic computing is highly diverse, linking areas such as artificial intelligence, data science, knowledge discovery and management, big data analytics, e-commerce, enterprise search, technical documentation, document management, business intelligence and enterprise vocabulary management. As such it forms an essential part of the computing technology that underpins all our lives today. This volume presents the proceedings of SEMANTiCS 2021, the 17th International Conference on Semantic Systems. As a result of the continuing Coronavirus restrictions, SEMANTiCS 2021 was held in a hybrid form in Amsterdam, the Netherlands, from 6 to 9 September 2021. The annual SEMANTiCS conference provides an important platform for semantic computing professionals and researchers, and attracts informatics managers, IT architects, software engineers, and researchers from a wide range of organizations such as research facilities, NPOs, public administrations and the largest companies in the world. The subtitle of the 2021 conference's was "In the Era of Knowledge Graphs", and 66 submissions were received, from which the 19 papers included here were selected following a rigorous single-blind reviewing process; an acceptance rate of 29%. Topics covered include data science, machine learning, logic programming, content engineering, social computing, and the Semantic Web, as well as the additional sub-topics of digital humanities and cultural heritage, legal tech, and distributed/decentralized knowledge graphs. Providing an overview of current research and development, this book will be of interest to all those working in the field of semantic systems. The two-volume

LNCS 12376 and 12377 constitutes the refereed proceedings of the 17th International Conference on Computers Helping People with Special Needs, ICCHP 2020, held in Lecco, Italy, in September 2020. The conference was held virtually due to the COVID-19 pandemic. The 104 papers presented were carefully reviewed and selected from 206 submissions. Included also are 13 introductions. The papers are organized in the following topical sections: Part I: user centred design and user participation; inclusive R&D; artificial intelligence, accessible and assistive technologies; XR accessibility – learning from the past, addressing real user needs and the technical architecture for inclusive immersive environments; serious and fun games; large-scale web accessibility observatories; accessible and inclusive digital publishing; AT and accessibility for blind and low vision users; A. Karshmer lectures in access to mathematics, science and engineering; tactile graphics and mobility for blind people and recognition of shapes by touch; and environmental sensing technologies for visual impairment Part II: accessibility of non-verbal communication: making spatial information accessible to people with disabilities; cognitive disabilities and accessibility – pushing the boundaries of inclusion using digital technologies and accessible eLearning environments; ICT to support inclusive education – universal learning design (ULD); hearing systems and accessories for people with hearing loss; mobile health and mobile rehabilitation for people with disabilities: current status, challenges and opportunities; innovation and implementation in the area of independent mobility through digital technologies; how to improve interaction with a text input system; human motion analysis for the design and evaluation of interactive systems and assistive devices; and service care provision in assistive environments 10 chapters are available open access under a Creative Commons Attribution 4.0 International License via link.springer.com. "This book consists of one hundred and nine selected papers presented at the 2015 International Conference on Materials Engineering and Environmental Science (MEES2015), which was successfully held in Wuhan, China during September 25-27, 2015. All papers selected for this proceedings were subjected to a peer-review process by at least two independent peers. The papers were selected based on their organization, and quality of presentation. The MEES2015 covered a wide spectrum of research topics, ranging from fundamental studies, technical innovations, to industrial applications in Chemical Material and Chemical Processing Technology, Composite Materials, Alloy Materials and Metal Materials, Characteristics of Materials, Building Material and Construction Technology, Ecology and Environment, Technology for Environmental Protection, Economy and Environment, Mechanical and Control Engineering, and Manufacturing Technology. The MEES2015 brought together more than one hundred researchers from China, South Korea, Taiwan, Japan, Malaysia and Saudi Arabia, and provided them with a forum to share, exchange and discuss new scientific development and future directions of Materials Engineering and Environmental Science."--Provided by publisher This book presents the proceedings of the 17th International Conference on Global Research and Education, Inter-Academia 2018 held in Kaunas, Lithuania on 24–27 September 2018. The main goal of the conference was to provide an international forum to review, stimulate, and understand the recent trends in both fundamental and applied research. In addition to increasing interest in recent research findings, the conference aimed to strengthen the cooperation between partners of the Inter-Academia community towards new theoretical and practical research activities. The papers included cover topics in the fields of material science and technology, nanotechnology, plasma physics, biotechnology and environmental engineering, electric and electronic engineering, robotics, measurement, identification, and control, soft computing techniques and modeling, multimedia and e-Learning. The book is a valuable scientific reference resource for the global scientific community. The increasingly arcane world of DNA profiling demands that those needing to understand at least some of it must find a source of reliable and understandable information.

Combining material from the successful Wiley Encyclopedia of Forensic Science with newly commissioned and updated material, the Editors have used their own extensive experience in casework across the world to compile an informative guide that will provide knowledge and thought-provoking articles of interest to anyone involved or interested in the use of DNA in the forensic context. Following extensive introductory chapters covering forensic DNA profiling and forensic genetics, this comprehensive volume presents a substantial breadth of material covering: Fundamental material – including sources of DNA, validation, and accreditation Analysis and interpretation – including, extraction, quantification, amplification and interpretation of electropherograms (epgs) Evaluation – including mixtures, low template, and transfer Applications – including databases, paternity and kinship, mitochondrial-DNA, wildlife DNA, single-nucleotide polymorphisms, phenotyping and familial searching Court - report writing, discovery, cross examination, and controversies With contributions from leading experts across the whole gamut of forensic science, this volume is intended to be authoritative but not authoritarian, informative but comprehensive, comprehensive but concise. It will prove to be a valuable addition, and useful resource, for scientists, lawyers, teachers, criminologists, and judges. "This collection of articles has been prepared by the Institute of the History of Natural Science and Technology, the USSR Academy of Sciences, for the 17th International Congress on the History of Science (USA, August 1985)"--Volume 1, page [unclear] cover. This two-volume set LNCS 13192-12193 constitutes the refereed proceedings of the 17th International Conference on Information for a Better World: Shaping the Global Future, held in February 2022. Due to COVID-19 pandemic the conference was held virtually. The 32 full papers and the 29 short papers presented in this volume were carefully reviewed and selected from 100 submissions. They cover topics such as: Library and Information Science; Information Governance and Ethics; Data Science; Human-Computer Interaction and Technology ? Information Behaviour and Retrieval ? Communities and Media ? Health Informatics. The book will focus on exploiting the art research in semantic web and web science. The rapidly evolving world-wide-web has brought revolutionary changes in the whole of society. The research and development of the semantic web covers a number of global standards of the web and cutting edge technologies, such as: linked data, social semantic web, semantic web search, smart data integration, semantic web mining and cloud computing. These proceedings are from the 6th Chinese Semantics Web Symposium. Today, online technologies are at the core of most fields of engineering and society as a whole . This book covers the fundamentals, applications and lessons learned in the field of online and remote engineering, virtual instrumentation, and other related technologies like Cross Reality, Data Science & Big Data, Internet of Things & Industrial Internet of Things, Industry 4.0, Cyber Security, and M2M & Smart Objects. Since the first Remote Engineering and Virtual Instrumentation (REV) conference in 2002, the event has focused on the use of the Internet for engineering tasks, as well as the related opportunities and challenges. In a globally connected world, interest in online collaboration, teleworking, remote services, and other digital working environments is rapidly increasing. In this context, the REV conferences discuss fundamentals, applications and experiences in the field of Online and Remote Engineering as well as Virtual Instrumentation. Furthermore, the conferences focus on guidelines and new concepts for engineering education in higher and vocational educational institutions, including emerging technologies in learning, MOOCs & MOOLs, and open resource learning. This book presents the proceedings of REV2020 on "Cross Reality and Data Science in Engineering" which was held as the 17th in series of annual events. It was organized in cooperation with the Engineering Education Transformations Institute and the Georgia Informatics Institutes for Research and Education and was held at the College of Engineering at the University of Georgia, Athens (GA), USA, from February 26 to 28, 2020.

If you ally compulsion such a reference ~~Discovery~~ Science 17th International Conference Ds 2014 Bled Slovenia October 8 10 2014 Proceedings Lecture Notes In Computer Science Lecture Notes In Artificial Intelligence book that will have enough money you worth, acquire the utterly best seller from us currently from several preferred authors. If you desire to witty books, lots of novels, jokes, and more fictions collections are afterward launched, from best seller to one of the most current released.

You may not be perplexed to enjoy all books collections ~~Discovery~~ Science 17th International Conference Ds 2014 Bled Slovenia October 8 10 2014 Proceedings Lecture Notes In Computer Science Lecture Notes In Artificial Intelligence that we will utterly offer. It is not on the subject costs. Its more or less what you obsession currently. This ~~Discovery~~ Science 17th International Conference Ds 2014 Bled Slovenia October 8 10 2014 Proceedings Lecture Notes In Computer Science Lecture Notes In Artificial Intelligence, as one of the most enthusiastic sellers here will entirely be in the middle of the best options to review.

Recognizing the showing off ways to acquire the ~~Discovery~~ Science 17th International Conference Ds 2014 Bled Slovenia October 8 10 2014 Proceedings Lecture Notes In Computer Science Lecture Notes In Artificial Intelligence and additionally useful. You have remained in right site to start getting this info. get the ~~Discovery~~ Science 17th International Conference Ds 2014 Bled Slovenia October 8 10 2014 Proceedings Lecture Notes In Computer Science Lecture Notes In Artificial Intelligence belong to that we manage to pay for here and check out the link.

You could buy lead ~~Discovery~~ Science 17th International Conference Ds 2014 Bled Slovenia October 8 10 2014 Proceedings Lecture Notes In Computer Science Lecture Notes In Artificial Intelligence get it as soon as feasible. You could quickly download this ~~Discovery~~ Science 17th International Conference Ds 2014 Bled Slovenia October 8 10 2014 Proceedings Lecture Notes In Computer Science Lecture Notes In Artificial Intelligence after getting deal. So, in the same way as you read the books swiftly, you can straight acquire it. Its consequently agreed easy and fittingly fats, You have to favor to in this express

This is likewise one of the factors by obtaining the soft documents ~~Discovery~~ Science 17th International Conference Ds 2014 Bled Slovenia October 8 10 2014 Proceedings Lecture Notes In Computer Science Lecture Notes In Artificial Intelligence by online. You might not require more times to spend to go to the book start as without difficulty as search for them. In some cases likewise pull off not discover the notice ~~Discovery~~ Science 17th International Conference Ds 2014 Bled Slovenia October 8 10 2014 Proceedings Lecture Notes In Computer Science Lecture Notes In Artificial Intelligence that you are looking for. It will utterly squander the time.

However below, once you visit this web page, it will be appropriately totally simple to get as as download guide ~~Discovery~~ Science 17th International Conference Ds 2014 Bled Slovenia October 8 10 2014 Proceedings Lecture Notes In Computer Science Lecture Notes In Artificial Intelligence

It will not say you will many mature as we accustom before. You can get it even if produce a something else at home and even in your workplace. fittingly easy! So, are you question? Just exercise just what we allow under as capably as ~~Discovery~~ Science 17th International Conference Ds 2014 Bled Slovenia October 8 10 2014 Proceedings Lecture Notes In Computer

Science Lecture Notes In Artificial Intelligence what you subsequent to to read!

Yeah, reviewing a book Discovery Science 17th International Conference Ds 2014 Bled Slovenia October 8 10 2014 Proceedings Lecture Notes In Computer Science Lecture Notes In Artificial Intelligence could grow your near connections listings. This is just one of the solutions for you successful. As understood, finishing does not suggest that you have astounding points.

Comprehending as with ease as treaty even more than supplementary will have enough money success. adjacent to, the pronouncement as with ease as keenness of this Discovery Science International Conference Ds 2014 Bled Slovenia October 8 10 2014 Proceedings Lecture Notes In Computer Science Lecture Notes In Artificial Intelligence can be taken as competently as pick act.
