In the wake of September 11, 2001, the Department of Homeland Security (DHS) was created to prevent terrorist attacks in the US. This led to dramatic increases in immigration law enforcement - raids, detentions and deportations have increased six-fold. Immigration Nation critically analyses the human rights impact of this tightening of US immigration policy. Golash-Boza reveals that it has had consequences not just for immigrants, but for citizens, families and communities. She shows that even though family reunification is officially a core component of US immigration policy, it has often torn families apart. This is a critical and revealing look at the real life - frequently devastating - impact of immigration policy in a security conscious world. Through an investigation of the body and its oppression by the church, the medical profession and the state, this book reveals the actual horrors lying beneath fictional horror in settings as diverse as the monastic community, slave plantation, operating theatre, Jewish ghetto and battlefield trench. The book provides original readings of canonical Gothic literary and film texts including The Castle of Otranto, The Monk, Frankenstein, Dracula and Nosferatu. This collection of fictionalised dangerous bodies is traced back to the effects of the English Reformation, Spanish Inquisition, French Revolution, Caribbean slavery, Victorian medical malpractice, European anti-Semitism and finally warfare, ranging from the Crimean up to the Vietnam War. The endangered or dangerous body lies at the centre of the clash between victim and persecutor and has generated tales of terror and narratives of horror, which function to either salve, purge or dangerously perpetuate such oppositions. This ground-breaking book will be of interest to academics and students of Gothic studies, gender and film studies and especially to readers interested in the relationship between history and literature. A clear, concise guide to understanding and using simple memory management techniques. The methods of Indian basket weaving explained in this excellent manual are the very ones employed by native practitioners of the craft. Members of the Navajo School of Indian Basketry have set down their secrets in clear and simple language, enabling even the beginner to create work that can rival theirs in grace, design, and usefulness. The text begins with basic techniques: choice of materials, preparation of the reed, splicing, the introduction of color, principles and methods of design, shaping the basket and finishing. A great variety of baskets and weaves from many cultures are described in subsequent chapters, such as Lazy Squaw, Mariposa, Toas, Samoan, Klikitat, and Shilo, each accompanied by specific instructions. There are suggestions for the weaving of shells, beads, feathers, fan palms, date palms, and even pine needles, and recipes for the preparation of dyes. Examples of each type of basket are illustrated by photographs, often taken from more than one angle so that the bottom can be seen as well as the top and sides. Close-up photography of the various types of stitching, especially at the crucial stage of beginning the basket, is an invaluable aid to the weaver. In addition, the authors have provided line drawings which are exceptionally clear magnifications of the various weave patterns. Anyone who follows the lessons contained in this book will have a knowledge of basketry unattainable in any other way. They are so lucid and complete that the amateur as well as the experienced weaver will be able to manufacture baskets distinguishable from authentic native articles only in that they were not woven by Indians. For those who merely seek a broader knowledge of American Indian arts, the book provides a comprehensive introduction to the subject of basketry.
