Since its emergence in early 2020, the COVID-19 crisis has affected every part of the world. Well beyond its health effects, the pandemic has wrought major changes in people's everyday lives as they confront restrictions imposed by physical distancing and consequences such as loss of work, working or learning from home and reduced contact with family and friends. This edited collection covers a diverse range of experiences, practices and representations across international contexts and cultures (UK, Europe, North America, South Africa, Australia and New Zealand). Together, these contributions offer a rich account of COVID society. They provide snapshots of what life was like for people in a variety of situations and locations living through the first months of the novel coronavirus crisis, including discussion not only of health-related experiences but also the impact on family, work, social life and leisure activities. The socio-material dimensions of quotidian practices are highlighted: death rituals, dating apps, online musical performances, fitness and exercise practices, the role of windows, healthcare work, parenting children learning at home, moving in public space as a blind person and many more diverse topics are explored. In doing so, the authors surface the feelings of strangeness and challenges to norms of practice that were part of many people's experiences, highlighting the profound affective responses that accompanied the disruption to usual cultural forms of sociality and ritual in the wake of the COVID outbreak and restrictions on movement. The authors show how social relationships and social institutions were suspended, re-invented or transformed while social differences were brought to the fore. At the macro level, the book includes localised and comparative analyses of political, health system and policy responses to the pandemic, and highlights the differences in representations and experiences of very different social groups, including people with disabilities, LGBTIQI people, Dutch

Muslim parents, healthcare workers in France and Australia, young adults living in northern Italy, performing artists and their audiences, exercisers in Australia and New Zealand, the Latin cultures of Spain and Italy, Asian-Americans and older people in Australia.
