[Bent But Not Broken](#) Oct 03 2021 Bent But Not Broken is a heartfelt journey of a girl and her family as they navigate the healthcare system from diagnosis to surgery and beyond. Follow them as they use their own words in blog posts and through an emotional and gripping narrative that puts you right by their side. All the ups, downs, challenges, and successes of the experience changed their lives and taught them that compassion and love build strong communities, even stronger families, and that true strength comes from the most unlikely sources. For the Butters family, the punch that knocked the wind out of them was a diagnosis of severe idiopathic scoliosis for their eleven-year-old daughter Avery. The only viable treatment option was spinal fusion surgery. It was a terrifying prospect to stare down. Frustrated with the lack of information on what the family would actually experience, Avery's mother, Jodi, started a family blog. It was there that Avery, Jodi, and Andrew would share their thoughts and experiences about the journey in real time. Jodi was determined that if there were other families searching for this information her family would be able to provide it. When it was all said and done and the blog came to its rightful conclusion, the writer in Andrew felt that since the blog was so successful at spreading the message then surely there were other ways to help spread the word and share lessons that even applied beyond Avery's scoliosis.

Masked Intentions Sep 21 2020 In the late 70's China was an awakening giant; decades of depressing self sufficiency theories left the country technologically, industrially and agriculturally backward. By 1975, Chou En Lai and Deng Tsao Ping recognized a renaissance of technology and open economy was required Achieving those goals required engagement with the U.S. to replicate, leapfrog and provide a starter engine. The engine which had accelerated the West's economies was the ubiquitous computer. How was China to get one? The United States strictly controlled the export of computers to the Communist world, particularly since the Korean War. The world leader in computers, IBM, was sought and responded. This book presents IBM and China's one year 1977 struggle in Beijing to write a contract that unleashed IBM's, China's and the U.S.'s restraints on computer exports and delivered China's first large-scale computer in 1978. The book presents the basis for China's ensuing economic boom. It tells a story of humor, strife and of lasting personal bonds. It reveals the mishaps of cross-cultural negotiation. And... it reveals how the Chinese plan for modern computer education was hidden in computer purchase. Three Chinese engineers – Messer's Wu, Mu and Shu - and two American IBM'ers enabled that deception and bridged the cultural gap. IBM now has thousands of employees in its Greater China organization and billions in revenue. China has a thriving Information Management industry and connection to the world through the internet all starting with this seed.

In Defense of the Princess Jul 12 2022 It's no secret that most girls, at some point, love all things princess: the poofy dresses, the plastic tiaras, the color pink. Even grown-up women can't get enough of royal weddings and royal gossip. Yet critics claim the princess dream sets little girls up to be weak and submissive, and allows grown women to indulge in fantasies of rescue rather than hard work and self-reliance. Enter Jerramy Fine – an unabashed feminist who is proud of her life-long princess obsession and more than happy to defend it. Through her amusing life story and in-depth research, Fine makes it clear that feminine doesn't mean weak, pink doesn't mean inferior, and girliness is not incompatible with ambition. From 9th century Cinderella to modern-day Frozen, from Princess Diana to Kate Middleton, from Wonder Woman to Princess Leia, Fine valiantly assures us that princesses have always been about power, not passivity. And those who love them can still be confident, intelligent women. Provocative, insightful, but also witty and personal, In Defense of the Princess empowers girls, women, and parents to dream of happily ever after without any guilt or shame.

Thirty Years Later . . . Catching Up with the Marcos-Era Crimes Jan 14 2020 Until they were expelled from power thirty years ago, in early 1986, the late dictator Ferdinand and Imelda Marcos (she, the Shoe Queen) jointly ruled the Philippines with impunity for 20+ years. They were an efficient cash-and-carry team—while he raided the national till, she shopped 'til she dropped. The present is an opportune time to take stock, especially as their only son and heir, Ferdinand, Jr., and others of his ilk, launches a comeback attempt for national office in this year's Philippine elections, and trying to re-fabricate history in the process.
