Although Cheryl Lowe's Latina Christiana program has been widely hailed for its easy to use format and student friendly layout, some parents asked us for something they could use with their young elementary children. So, we gathered together our years of experience with young Latin scholars and created Prima Latina, an introductory Latin course for students in kindergarten through fourth grades. Prima Latina was developed for young children who are still becoming familiar with English grammar and wish to learn Latin at a slower pace. The program provides 25 lessons, each including a grammar skill, 5 vocabulary words with corresponding English derivatives, a practical Latin phrase, and one line of a prayer that is learned in totality over five lessons. The exercises that accompany each lesson are thorough and provide constant review of materials learned throughout the course. After each five lessons, a review chapter summarizes the material covered and provides a keyed test to insure mastery. With grammar lessons appropriate for primary grades and an easy to read two color format, Prima Latina is the perfect choice for those who would like to start Latin early and lay the foundation of a rigorous language arts program. Prima Latina was written to transition directly into Latina Christiana allowing students to complete an entire Latin sequence without missing important concepts or vocabulary. Prima Latina is accompanied by an audio CD which includes pronunciation direction for each lesson and four beautiful hymns from Lingua Angelica. Because Latina Christiana I Flash Cards include every word in Prima Latina, they are an ideal study aid and a great investment for students who intend to continue on with Latina Christiana. Prima uses a clear and systematic format to introduce Latin to young students. It teaches important English and Latin grammar concepts as well as vocabulary, sayings, prayers, hymns, and constellation. Some of the material covered in Prima is: An instruction manual for use with the fifth edition of Understanding Fiber Optics by Jeff Hecht. This book includes an overview for instructors, answers to quizzes and "questions to think about" published in the book, worked-out solutions to selected problems with equations, and additional material to supplement the book. This is the original manual prepared and published in 2006 along with the fifth edition of Understanding Fiber Optics, with only

minimal updates. The record of each copyright registration listed in the Catalog includes a description of the work copyrighted and data relating to the copyright claim (the name of the copyright claimant as given in the application for registration, the copyright date, the copyright registration number, etc.). Suitable both for people setting out to be instructors and for seasoned professionals, this resource provides a guide to the scientific, instructional and professional knowledge required of group fitness instructors. Chapters include: exercise physiology; fundamentals of anatomy; biomechanics and applied kinesiology; nutrition and weight control; health screening; fitness testing and aerobic programming; teaching an aerobic class; special populations and health concerns; exercise and pregnancy; musculoskeletal injuries; emergency procedures; and legal and professional responsibilities. This instructor's manual was designed to help graduates of the California Bus Driver Instructor Course provide effective instruction to school bus driver trainees. It contains enough material for 20-30 hours of classroom training. The information is organized in 12 instructional units that cover the following topics: introduction to the course; driver's license and special certificate requirements; bus operation, use, laws, and regulations; vehicle components; general defensive driving techniques; specialized defensive driving techniques; passenger loading and unloading; emergency procedures; passenger management; activity trips; the special needs passenger; and public and community relations. Each unit includes an outline of the lesson plans in it, notes to the instructor, content information, handouts, and pretests and unit test. A final unit of the guide provides additional information for the instructor on teaching the course, such as materials needed to conduct classes, classroom arrangement, lesson planning and teaching techniques, and tests and answer keys. (KC) Includes Part 1, Number 1: Books and Pamphlets, Including Serials and Contributions to Periodicals (January - June)
