The Third Edition of an excellent book and is usefully updated to include the greater significance of the global contest of management, and in particular Tony Bush has consciously updated reference material. This, like all Tony Bush's work, is an essential reading for students following higher degree courses in the area of management studies in education, and increasingly those social policy students on higher degrees with an education option' - John L Doyle, *The International Journal of Educational Management* In summary, this book makes an excellent contribution to the current debate on Management and Leadership from a theoretical point of view. It provides an important resource for many aspects of management and leadership development programmes at a variety of levels. Its ability to draw upon international perspectives along with examples beyond conventional educational parameters enhances its quality. The book contains a well documented account of how leadership has been studied which will appeal both to the academic reader, and to the professional provider of CPD in leadership, offering a wealth of information that can be practically adopted and adapted for a range of courses' - *British Journal In-Service Education* In this established bestselling text (previous title *Theories of Educational Management*), Tony Bush presents the major theories of educational management and links them to contemporary policy and practice. This fully revised Third Edition includes two important changes in content. First, the book takes account of the increasing interest in the concept of leadership. Leadership continues to be one of the major criteria used to differentiate the models but there are now explicit links between educational management theories and the main models of leadership. The second change is that, in this edition, the author applies the models to a range of international contexts, including both developed and developing countries. This change relates to global interest in concepts of leadership and management and to an increasing recognition of the need to customize theory and practice to each context and culture rather than adopting a 'one size fits all' approach. This text is essential reading for students of educational leadership and management as well as for headteachers and managers in education. *Leadership for Health Professionals, Third Edition* is the first textbook of its kind to apply classical knowledge of leadership theory and time-honored best practices of industry leaders to a health organization context. This comprehensive and well-organized text is grounded in real-world applications of theoretical concepts, and focuses on practical examples of leadership in actual healthcare scenarios.
