In this collection of essays and interviews, web veterans such as Theo Schlossnagle, Baron Schwartz, and Alistair Croll offer insights into this evolving field. You'll learn stories from the trenches--from builders of some of the biggest sites on the Web--on what's necessary to help a site thrive. [Global Operations Strategy](#) Feb 08 2022 While many business schools are teaching Global Operations Strategy with self-made teaching materials, there are no such textbooks. Combining practical approaches with detailed theoretical underpinnings, this book provides theories, tools, frameworks, and techniques for global operations strategy, and brings real world perspectives to students and managers. Each chapter includes definition of key terms, introduction of fundamental theories, several short case examples, one long new case to explain the associated theories, and recommended further reading.

The Handbook of Behavioral Operations Management Nov 17 2022 The Handbook of Behavioral Operations Management provides easy-to-access insights into why associated behavioral phenomena exist in specific production and service settings, illustrated through ready-to-play games and activities that allow instructors to demonstrate the phenomena in class settings along with applicable prescriptions for practice. By design the text serves a dual role as a desk/training reference to those practitioners already in the field and presents a comprehensive framework for viewing behavioral operations from a systems perspective. As an interdisciplinary book relating the dynamics of human behavior to operations management, this handbook is an essential resource for practitioners seeking to develop greater system understanding among their workers, as well as for instructors interested in emphasizing the practical relevance of behavior in operational settings.

Evolution of Airborne Operations 1939-1945 Jul 13 2022 The development of air transport in the early 20th Century led military strategists to examine the concept of inserting light infantry at key points behind enemy lines by air landing and air drop. The Germans were first off-the-mark with assaults in Norway and at Eben Emael in 1940. Crete saw a larger scale attack but while ultimately victorious the cost of men and equipment involved deterred any further Axis operation. The Allies on the other hand developed the concept dramatically with the large scale operation HUSKY in Sicily. While only partially successful □ there was massive loss of life and aircraft □ airborne operations were a key, if relatively minor, element of Op OVERLORD □ The D-Day Invasion. The most famous airborne operation was the large scale but ill-fated MARKET GARDEN. Almost successful the Arnhem battle goes down as a heroic defeat. The culmination of WWII airborne operations was the multi-division Rhine Crossing VARSITY. Expert author and collector Roy Stanley traces the history of airborne landings in words and pictures.

War and Media Operations Jan 27 2021 This is the first academic analysis of the role of embedded media in the 2003 Iraq War, providing a concise history of US military public affairs management since Vietnam. In late summer 2002, the Pentagon considered giving the press an inside view of the upcoming invasion of Iraq. The decision was surprising, and the innovative "embedded media program" itself received intense coverage in the media. Its critics argued that the program was simply a new and sophisticated form of propaganda. Their implicit assumption was that the Pentagon had become better at its news management and had learned to co-opt the media. This new book tests this assumption, introducing a model of organizational learning and redraws the US military's cumbersome learning curve in public affairs from Vietnam, Grenada, Panama, the Persian Gulf, Somalia, the Balkans to Afghanistan, examining whether past lessons were implemented in Iraq in 2003. Thomas Rid argues that while the US armed forces have improved their press operations, America's military is still one step behind fast-learning and media-savvy global terrorist organizations. War and Media Operations will be of great interest to students of the Iraq War, media and war, propaganda, political communications and military studies in general.

Humanitarian Action and Peace Keeping Operations Jan 19 2023 This is the third work in the series of conferences held in Singapore on various aspects of United Nations Peacekeeping operations, under the auspices of the United Nations Institute for Training and Research (UNITAR), the Institute of Political Studies (IPS) of Singapore and the National Institute for Research Advancement (NIRA) of Japan. The 1997 Conference focused on humanitarian action and peacekeeping operations and brought together key practitioners and scholars from the Security Council, those interested in government, the International Committee of the Red Cross (ICRC), other humanitarian NGOs, academics and military personnel. Since the end of the Cold War, the number and complexity of UN peacekeeping operations have increased dramatically due to profound changes in many areas of the world. The recent trend has seen a shift from inter-state to intra-state conflicts, bringing in its wake a myriad of operational, legal and political questions, such as the very relevance and applicability of the principle of non-interference in the internal affairs of the state. Parties to recent conflicts have no central authority and little or no regard for international humanitarian law. Interested and involved parties on the peacekeeping and humanitarian scene have also changed and multiplied. All these factors render humanitarian action more complex, dangerous and difficult for all parties involved. The book reviews four United Nations peacekeeping operations that have undergone immense difficulties, viz. in Somalia, the former Yugoslavia, Rwanda and Liberia. It debates the pertinent political framework for humanitarian action in each case. It explores the relationship between humanitarian and military action, of coordination with regional organizations and multinational force, as well as fundamental questions regarding the role and responsibility of the member states of the Security Council. Its findings can provide policy-makers, researchers and analysts of international affairs with a sober and thorough assessment of past experience and lessons for the future.

Getting and Staying Productive Oct 24 2020 All kinds of processes - those that make things or deliver services or operate companies - can be made more productive, and society's continued well-being requires it. This book is for all those with a stake in improving how companies run. It introduces the concept of 'swift, even flow' and explains how that concept stands behind popular business tools such as 'lean' principles and Six Sigma. More than that, it shows how swift, even flow can lead to deep, strategic insights and fresh ideas. The book uses many examples, both contemporary and historic, and 16 case studies from all sorts of business situations to demonstrate how swift, even flow can be applied. Services and manufacturing, supply chains and individual operations, product development and outsourcing, strategy and tactics, hourly workers and top level executives - all benefit from this fundamental re-thinking of what it takes to become productive.

General Creighton Abrams And The Operational Approach Of Attrition In The Vietnam War Dec 14 2019 General Creighton Abrams assumed command of United States forces in the Republic of South Vietnam in the summer of 1968. In recent years, this change in leadership has been viewed as a radical departure from the operational approach implemented by his predecessor General William Westmoreland. This monograph proposes that the United States Armed Forces consistently followed a strategy of attrition from the introduction of battalion sized combat troops in 1965, through the Westmoreland-Abrams transition, and ultimately encouraged the South Vietnamese to follow this strategy during the period of Vietnamization. The National Command Authority and General Westmoreland specifically adopted a strategy of attrition in February of 1966. The Military Assistance Command Vietnam implemented this strategy throughout 1966 and accelerated the strategy in 1967, when General Abrams became General Westmoreland's deputy commander. The operations were specifically designed to attrite Viet Cong and North Vietnamese regular forces as outlined in the 1966 meeting. The Tet offensive of January 1968 appeared to discredit the strategy of attrition and contributed to the ouster of Westmoreland and his replacement by General Abrams. General Abrams promoted a "one-war" strategy which had the desired end state of population security for the people of South Vietnam. In reality the "one-war" was a multi-tiered strategy of attrition. While the tactics of large scale search and destroy missions were modified, the operational purpose was not. Simultaneously, the Phoenix Program conducted constant low level attrition warfare at the village level to prevent the resurgence of the Viet Cong. While these operations were being conducted the national command authority adopted the policy of Vietnamization in the summer of 1969.

Industrialization and Development in the Third World May 19 2020 Developing countries have undergone significant industrialization in the last three decades. Yet industrial growth reveals marked spatial inequalities in terms of both country and location. The Newly Industrialised Countries have achieved spectacular growth in sharp contrast to many other countries of the South. Industrial structure has changed, moving away from labour intensive industries to more technologically advanced manufacturing. Developing countries have had considerable success in penetrating developed country markets but they are now encountering more market restrictions. The role of the government in the development of the economy is also changing. Increasingly, countries are turning towards export-orientated industrialization strategies and privatization whilst their governments are emphasising their facilitative role.
